ANFAL BIN RAZZAK

DevOps Engineer

01722928701 anfalratul@gmail.com Mirpur 2, Dhaka Linkedin

EXPERIENCE

Devops Engineer

Nec money Transfer Limited

04/2026 - Present Banasree, Dhaka, Bangladesh

- Performed vulnerability assessment and penetration testing (VAPT) using OpenVAS, Nmap, Masscan, and OWASP ZAP to identify and fix security risks.
- Configured iptables firewall rules to block vulnerable ports and secure public-facing servers.
- Managed SSL certificates and configured Nginx reverse proxy for multiple subdomains.
- Built custom script-based health monitoring system with Telegram alert integration and email for real-time server health notifications.
- Deployed and managed over 70 Docker containers running NestJS microservices across production data center and disaster recovery environments.
- Designed and maintained disaster recovery (DC-DR) failover architecture for high availability.
- Built custom AES-256 encryption tools for securing sensitive environment configuration files with developers.
- Set up CI/CD pipelines to automate and accelerate app and web deployment.
- Configured YAML deployment files and deployed campaign management microservices that enable teams to send SMS, email, and advertising campaigns through bulk file uploads.
- Configured and managed Fortinet FortiGate firewalls for network security across multiple data center environments (DC & DR).
- Set up AWS Site-to-Site VPN tunnels using Fortinet FortiGate and IPsec (Phase 1 & Phase 2 configuration), connecting Dhaka Colo data center with AWS cloud for hybrid cloud and disaster recovery support.
- Performed network security optimization including firewall rule tuning, port hardening, and traffic filtering to improve overall infrastructure security posture.

SUMMARY

DevOps professional with experience in cloud platforms, CI/CD pipelines and infrastructure automation. Passionate about building scalable systems, improving performance and continuously learning while solving real-world problems

SKILLS

Technical Skills

Docker GitHub Actions AWS Jenkins Prometheus Grafana Linux Kafka Redis Ansible Nginx Kong API Gateway JavaScript Python Node.js MySQL PostgreSQL MongoDB

EDUCATION

Research Assistant

University of Fukui

09/2025 - 03/2026 Fukui, Japan

- Specialization in Automata Theory & Quantum Computing

B.Sc. in Computer Science and Engineering

Daffodil International University-DIU

01/2020 - 01/2024 Dhaka, Bangladesh

- Major in Cloud Engineering & Web Development

CERTIFICATIONS

Hands On Introduction to Orchestration with Kubernetes

UDEMY

Master Linux Basics With Projects And Deep Explaination

UDEMY

EXPERIENCE

DevOps Engineer

Red Technologies Ltd

02/2024 - 07/2025 Dhaka, Bangladesh

- Set up CI/CD pipelines using GitHub Actions, Jenkins, and Docker to make app deployment automatic and faster.
- Managed AWS cloud services like EC2, S3, Route 53, and RDS to run and support fintech applications.
- Worked closely with development teams to make applications run faster and more reliably.
- Set up monitoring and alert systems using Prometheus and Grafana to keep track of server health on DC-DR servers.
- Built a central log system using OpenSearch, ISM, Logstash, and Filebeat to make finding and fixing issues easier.
- Managed and migrated databases (MySQL, MSSQL, PostgreSQL) multiple times without data loss.
- Set up load balancing to spread traffic evenly and keep the system running smoothly.
- Deployed MinIO storage system for low-cost, scalable data storage, and kept data synced between DC and DR servers.
- Used Apache Kafka to handle real-time data streaming and connect different systems.
- Managed APIs using Kong Gateway to keep service communication secure and efficient.
- Configured and managed Fortinet FortiGate firewalls for network security across multiple data center environments (DC & DR).
- Set up AWS Site-to-Site VPN tunnels using Fortinet FortiGate and IPsec (Phase 1 & Phase 2 configuration), connecting Dhaka Colo data center with AWS cloud for hybrid cloud and disaster recovery support.
- Performed network security optimization including firewall rule tuning, port hardening, and traffic filtering to improve overall infrastructure security posture.

CERTIFICATIONS

Complete Web Development

Programming Hero

PHP WITH LARAVEL FRAMEWORK

PencilBox Training Institute supported by SEIP
